It was a pleasure working with competent, professional people who are dedicated to providing superior service and quality. The actions and work habits of Ohio Valley Electric's employees also demonstrated an obvious commitment to safety.

Of the many contractors I have worked with over the past years, I would say that Ohio Valley Electrical Services is one of the best. As everyone knows in the construction industry the field people are key and Ohio Valley Electric has by far some of the most talented in the business.

Sincerely,
